Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/580,451

Applicant(s)

KOHEN, RAN

Examiner

Hae M. Hyeon

Art Unit

2839

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 August 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-6 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-6 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 16 August 2007 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Pages 1 and 3 of the present specification contain foreign patent numbers and US patent numbers. Amendment filed on August 16, 2007 did not include IDS with the list of these references.

Drawings

2. The drawings were received on August 16, 2007. These drawings are not approved because the replacement drawings still include hand written reference numbers, lines that are not uniformly thick (mixture of thin, thick and dark lines) and Figures 2-4 with dark and smear views that do not show clear structure. Therefore, the drawings are still objected.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure

Art Unit: 2839

must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

MPEP 37 C.F.R. 1,84(I)

(I) Character of lines, numbers, and letters. All drawings must be made by a process, which will give them satisfactory reproduction characteristics. **Every line, number, and letter must be durable, clean, black (except for color drawings), sufficiently dense and dark, and uniformly thick and well-defined.** The weight of all lines and letters must be heavy enough to permit adequate reproduction. This requirement applies to all lines however fine, to shading, and to lines representing cut surfaces in sectional views. Lines and strokes of different thicknesses may be used in the same drawing where different thicknesses have a different meaning.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kohen (US Patent Application Publication No. 2003/0107891 A1) in view of Majors (US 6,135,800).

Art Unit: 2839

Kohen discloses a combination of a fixable socket 10 and a revolvable plug 12 comprising a socket 10 rigidly attached to a structure surface 16, comprising a body (not labeled) having a front face with three spaced-apart 360 degrees hollow arcuate receptacles, all having a common center of curvature, a conductive element 30 disposed in each receptacle, and a cable terminal 32 connected to each conductive element 30; a plug comprising a body having a plurality of arcuate conducting prong elements 43, a plug cable terminal 62 electrically connected to each prong element 43, an appliance 14 mechanically and electrically connected to the plug 12 to receive power from the plug cable terminal 62; and releasable latching means 46 having a captive ball detent 72 to provide a retention force between the socket 10 and the plug 12 and to allow full disengagement of the plug 12 from the socket 10 and partial withdrawal of the plug 12 to permit revolution of the plug while maintaining contact with the socket 10. However, Kohen does not disclose a first set of radial locator element provided on the front face of the socket 10 and a second set of locator elements on a rear face of the plug 12 for retention of the plug 12 in a desired angular position relative to the socket 10.

Majors discloses an electrical connector comprising a plug 102 having a coupling ring 106 with a plurality of V-shaped notches 122 (teeth) and a contact carrier 108 having a plurality of raised bumps 136 for engaging with the V-shaped notches 122 to prevent rotational movement between the coupling ring 106 and the contact carrier 108. Although the V-shaped notches 122 and the raised bumps 136 are not in a plug and a socket, respectively, the V-shaped notches 122 and the raised bumps 136 of Majors solves the same problem as the claimed invention, maintaining a position of one body (coupling ring 106) respect to another body (contact carrier 108) and preventing a rotational movement between the two bodies.

Art Unit: 2839

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to modify the connector taught by Kohen such that it would have notches and raised bumps on as taught by Majors in order to retain a plug in a desired position relative to a socket and prevent rotational movement between the plug and the socket.

Response to Arguments

5. Applicant's arguments filed on August 16, 2007 have been fully considered but they are not persuasive.

The applicant argues that the reference US Patent Application Publication No. 2003/0107891 A1 by Kohen is not a prior art under §102 because Kohen was published on June 12, 2003 while the present invention claims foreign priority to November 24, 2003, which is within one year preceding the date of invention of the present invention.

The examiner disagrees with the applicant because of two reasons. **First**, the present application **does not claims foreign priority**. The present Oath/Declaration does not claims foreign priority and the applicant did not submit any certified foreign document. Also, the first page of the present specification does not state the foreign priority documentation according to **Cross-References to Related Applications: See 37 CFR 1.78 and MPEP § 201.11**. Therefore, the present application **does not meet** any of the requirements for claiming foreign priority. **Second**, the present application is a national stage entry of PCT/US04/39399 filed on November 22, 2004, which is the effective filing date. Since the reference by Kohen was published on June 12, 2003, which is more than a year before the published date of the present application, the reference by Kohen qualifies as 35 U.S.C. 102(b) reference. Therefore, the reference by Kohen

Art Unit: 2839

also qualifies as 35 U.S.C. 103(a) reference. Thus, the rejection stated in the last office action is appropriate.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hae M. Hyeon whose telephone number is 571-272-2093. The examiner can normally be reached on Mon.-Fri. (8:30-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tulsidas C. Patel can be reached on (571) 272-2098. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2839

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
